Subject: Traffic Plan and Access Agreement Needed ASAP for City of
Goodyear

Matt, One other important item, that Joel Wade and I discussed Friday. Per Joel, in order to start drilling on Monday, Jan 6, 2003, along Van Buren, we need to move fast on 2 items.

1. We need to get an access agreement from the City;
2. However, Joel indicated that we must first get an approved Traffic Plan from the City, prior to getting any approval for access. I'll send a voice mail message to you later this morning with the City Traffic Engineer contact name and phone number.

Because of the holidays, and a possible need to go in front of the City Council, this could be a real hang-up. However, Joel, felt it perhaps could be expedited, as long as we have the Traffic Plan approved right away. Need to discuss this with you and get this plan drafted as soon as possible.

Thanks so much. Andria
